PROJECTS

Personal Portfolio — captainefff.github.io

A constantly growing collection of apps and projects built both in and outside of my studies.

Piquant Places — captainefff.github.io/project_1

A web app using google's apis to retrieve restaurant data and display a heatmap that represents the "Hottest" places to eat.

Game Library — virtualbacklog.herokuapp.com

A virtual game library that one can curate themselves. Allows for user entry or barcode scanning of physical games to populate your own game shelf.
